

No one likes reading a boring, ugly wall of text. When you have to clearly separate information, dividers can break up a message or embed in a simple yet attractive way. The dividers provided come in multiple colors, so get unique and creative!

To create a seamless line that stretches the width of your embed or message, you will have to paste them repeatedly. Avoid having spaces between each emoji, unless you prefer that look. Take a look at the picture on the right to see how wide the emojis actually are. That's right, they're very small. Thus, you may need to paste a lot of them. In sequence, they form a clean line that can be whatever width you prefer, depending on the scenario.

*Animated dividers work the same way, but can offer more visual options than a regular, static divider.**
