

Say  to boring walls of text. Create beautiful lists with sub-entries, as well as bullet points of multiple shapes and colors.

Bullets ●

Bullet points are the most essential characters for creating lists. Select from the standard circle bullet point, to arrows, squares, diamonds, and even stars*. Get creative and combine colors to make your information channels stand out from other servers!

Self Roles

These roles can be obtained in the `#💎 · roles` channel. These include:

- Regional roles
- Gender roles
- Interests
- Notification subscriptions

Sub Entries └

Honestly, I was not sure what to call these..

Sub entries, like the bullets, come in multiple colors and a variety of styles. They often work kind of like a bullet point inside a bullet point, but they also can expand upon a statement with some extra information like below.

Note: The image below makes use of the 'empty' emoji, which has been used to indent the sub-entries.

- Unlock the special 'Aether' role icon
 - └ Boosting 6 months in a row lets you upload a custom role icon
- Access to the 'Aether' voice channel
- Join our weekly Sunday game night!
 - └ More information can be found in the Game Nights channel.
 - └ We do not host these game nights on the last week of the month.
