

Finding the right font for your server's artwork can be a difficult task. There are countless fonts on the internet, and narrowing down to the best is not easy. That is why people often ask me what fonts I like to use in my designs, primarily headers. Finding the best fonts is easier when you've had years of experience playing around with designs and typography!

Here is a collection of fonts that I often use, have used before, or generally recommend. For legal reasons, I cannot provide downloads to these fonts.
